

This Final Environmental Impact Report (FEIR) was prepared in accordance with the California Environmental Quality Act (CEQA), the State CEQA Guidelines (Section 15132). The County of Tehama is the lead agency for the environmental review of the proposed 2008-2028 General Plan and has the principal responsibility for approving the project. This FEIR assesses the expected environmental impacts resulting from adoption and implementation of the General Plan, as well as responds to comments received on the Draft EIR.

2.1 BACKGROUND AND PURPOSE OF THE EIR

OVERVIEW OF CEQA REQUIREMENTS FOR PREPARATION OF AN EIR

The County of Tehama (County), serving as the Lead Agency, has prepared this EIR to provide the public and responsible and trustee agencies with information about the potential environmental effects of the proposed General Plan. As set forth in the provisions of CEQA and implementing regulations, public agencies are charged with the duty to consider the environmental impacts of proposed development and to minimize these impacts where feasible while carrying out an obligation to balance a variety of public objectives, including economic, environmental, and social factors.

State CEQA Guidelines Section 15121(a) states that an EIR is an informational document for decision-makers and the general public that analyzes the significant environmental effects of a project, identifies possible ways to minimize significant effects, and describes reasonable alternatives to the project that could reduce or avoid its adverse environmental impacts. Public agencies with discretionary authority are required to consider the information in the EIR, along with any other relevant information, in making decisions on the project.

CEQA requires the preparation of an environmental impact report prior to approving any project, which may have a significant effect on the environment. For the purposes of CEQA, the term "project" refers to the whole of an action, which has the potential for resulting in a direct physical change or a reasonably foreseeable indirect physical change in the environment (CEQA Guidelines Section 15378[a]). With respect to the proposed 2008-2028 General Plan, the County has determined that the proposed development is a "project" within the definition of CEQA.

BACKGROUND OF ENVIRONMENTAL REVIEW PROCESS OF THE PROJECT

The following is an overview of the environmental review process for the 2008-2028 General Plan that have led to the preparation of this FEIR.

Notice of Preparation and Initial Study

The County of Tehama was identified as the Lead Agency for the proposed project. In accordance with Section 15082 of the CEQA Guidelines, the County of Tehama prepared a Notice of Preparation (NOP) for an EIR on July 16, 2007. This Notice of Preparation was sent to twenty-four public agencies. The Office of Planning and Research assigned this NOP a State Clearinghouse number, #2007072062. The public comment period commenced on July 16, 2007 and ended on August 14, 2007. A notice was circulated to the public, local, state, and federal agencies, and other interested parties to solicit comments on the proposed project. Eight public agencies provided comments. A public scoping meeting on the Notice of Preparation and Draft General Plan update was conducted on August 1, 2007 in the City of Red Bluff. A Notice of Availability and Public Hearing was published for this meeting on July 16, 2007 in the Red Bluff Daily News (see Appendix 2.1-1 of the Draft EIR).

2.0 INTRODUCTION

Draft EIR

The Draft EIR (DEIR) was released for public and agency review on September 19, 2008. The DEIR contains a description of the project, description of the environmental setting, identification of project impacts, and mitigation measures for impacts found to be significant, as well as an analysis of project alternatives. The Draft EIR was provided interested public agencies and the public and was made available for review at Tehama County Planning Department and the County's website.

Final EIR

The County received 44 comment letters from agencies, interest groups and the public regarding the Draft EIR. Additionally, four persons provided comments during the October 16, 2008 Planning Commission meeting. This document responds to the written and verbal comments received as required by CEQA. This document also contains minor edits to the Draft EIR, which are included in Section 4.0 (Errata). This document constitutes the FEIR.

Certification of the Final EIR/Project Consideration

The County will review and consider the FEIR. If the County finds that the FEIR is "adequate and complete", the County may certify the FEIR. The rule of adequacy generally holds that the EIR can be certified if: 1) it shows a good faith effort at full disclosure of environmental information; and 2) provides sufficient analysis to allow decisions to be made regarding the project in contemplation of its environmental consequences.

Upon review and consideration of the Final EIR, the County may take action to adopt, revise, or reject the proposed 2008-2028 General Plan. A decision to adopt the General Plan would be accompanied by written findings in accordance with State CEQA Guidelines Section 15091 and Section 15093. Public Resources Code Section 21081.6 also requires lead agencies to adopt a reporting and mitigation monitoring and reporting program to describe measures that have been adopted or made a condition of project approval in order to mitigate or avoid significant effects on the environment.

2.2 TYPE OF DOCUMENT

The State CEQA Guidelines identify several types of EIRs, each applicable to different project circumstances. This EIR has been prepared as a Program EIR pursuant to CEQA Guidelines Section 15168. According to Section 15168:

A program EIR is an EIR which may be prepared on a series of actions that can be characterized as one large project and are related either:

- (1) Geographically,*
- (2) As logical parts in the chain of contemplated actions,*
- (3) In connection with issuance of rules, regulations, plans or other general criteria to govern the conduct of a continuing program, or*
- (4) As individual activities carried out under the same authorizing statutory or regulatory authority and having generally similar environmental effects which can be mitigated in similar ways.*

The program-level analysis considers the broad environmental effects of the overall proposed

General Plan. This EIR will be used to evaluate subsequent projects and activities under the proposed General Plan. Additional environmental review under CEQA will be required and would be generally based on the subsequent project's consistency with the General Plan and the analysis in this EIR, as required under CEQA. When individual projects or activities under the General Plan are proposed, the County would be required to examine the projects or activities to determine whether their effects were adequately analyzed in the program EIR (State CEQA Guidelines Section 15168). If the projects or activities would have no effects beyond those analyzed in this EIR, no further CEQA compliance would be required.

2.3 INTENDED USES OF THE EIR

This EIR has been prepared in accordance with the California Environmental Quality Act, consistent with the most current update to the CEQA Guidelines. The EIR is intended to evaluate the environmental consequences of implementing the 2008-2028 General Plan update. This EIR, in accordance with CEQA Guidelines Section 15126, should be used as the primary environmental document to evaluate subsequent planning and permitting actions associated with implementation of the Project, including, but not limited to the following:

- Future updating of the Zoning Ordinance
- Development of Public Facility Master Plans
- Evaluating Capital Improvement Plans
- Street and highway improvement plans
- School and park development
- Historic preservation plans

Additional project-specific and site-specific analysis will be needed when future projects and actions exceed the scope of impact analysis contained in this EIR.

2.4 ORGANIZATION AND SCOPE OF THE FINAL EIR

This document is organized in the following manner:

SECTION 1.0 - EXECUTIVE SUMMARY

This section provides an overview of the project and the environmental analysis. For additional detail regarding specific issues, please consult sections 4.1 through 4.14 of the Draft Environmental Impact Report (Draft EIR).

SECTION 2.0 - INTRODUCTION

Section 2.0 provides an overview of the EIR process to date and what the FEIR is required to contain.

Section 3.0 - COMMENTS AND RESPONSES TO COMMENTS ON THE DRAFT EIR

Section 3.0 provides a list of commenters, copies of written comments (coded for reference) and the responses to those written comments made on the Draft EIR.

2.0 INTRODUCTION

SECTION 4.0 – ERRATA

This section consist of revisions to the Draft EIR that are a result of responses to comments, as well as minor staff edits that do not change the intent or content of the analysis or mitigation measures. Revisions appear in ~~strike through~~ and underline.
