Mr. Robson explained the Draft General Plan and Background Report are available at the Planning Department, website and on CD. He also explained the Environmental Impact Report (EIR) is being prepared on the Draft General Plan and should be available around November 1<sup>st</sup>. He explained the 45 day public review process and the timeline for the EIR and noted there will be Notices of Availability posted in the newspaper and online. He explained in detail the process for the Planning Commission workshops and Board of Supervisors public hearings. Mr. Robson explained that comments can be submitted throughout the process and there will be several public hearings in which the public can still comment on the documents. Mr. Robson stated the target date for the approval of the Final General Plan document is April 2008.

Mr. Robson explained the highlights of changes within District 4 and the process the General Plan Revision Project Advisory Committee had in developing the Draft General Plan. He explained this was a collaboration of several entities. He explained the major changes within District 4 and the definitions of the Upland Agricultural Zoning District, Valley Floor Agricultural, Rural Small Lot. He stated that currently the Cropland designation is 10, 20 and 40 acre parcel sizes; Upland Agricultural Grazing designation is 40 and 160 acre minimums.; Valley Floor would be a 20 acre minimum parcel size and 40 acre minimum parcel size for Williamson Act property; Upland Agricultural would be 160 acre minimums. He stated that what was called Grazing is now Upland Agricultural and 160 acre minimum that is a significant departure from some areas of

the county and a major change to the valley floor. Some areas that were previously 10 acre minimums are now 20 acre minimums if adopted.

Another area of change is proposed is Rural Small Lot designation (dark purple on the map). He reviewed the changes in the South Avenue area along I-5 and the Special Planning Area designation North I-5 and Conceptual Plans; Commercial area at Finnell overpass.

Mr. Robson emphasized the General Plan is a General Plan conception of development, use of lands, resource management, it is not a license to development, it is not an entitlement. There are many other aspects that need to take place before projects can be completed.

Chairperson Turri opened the public hearing for comments.
